INDEX OF SUBJECTS

Abelmoschus esculentis, see Okra

ACIAR Proceedings, by various authors and editors, reviewed by N. W. Simmonds, 473

Africa, eastern, and the yield distribution of irrigated tea at two sites there (Carr, Dale and Stephens), 75

Africa, north, and west Asia, improving water use efficiency of annual crops in the rainfed farming systems there (Cooper, Gregory, Tully and Harris), 113

African spinach, growth under different daylight intensities in the dry season in southern Nigeria (Eze), 193

Age at harvest and planting time effects on cassava in northern Australia. I. Crop growth and yield in moist environments (Hammer, Hobman and Shepherd), 401; II. Crop growth and yield in a seasonally-dry environment (Hobman, Hammer and Shepherd), 415

Age of seedlings and transplanting effects on stand establishment and grain yield of rice in rainfed lowland (intermediate deep-water) conditions (Reddy, Ghosh and Reddy), 201

Agricultural Development in Drought-Prone Africa, ed. by L. F. Foster, reviewed by K. R. M. Anthony, 357

Agricultural Systems Research for Developing Countries, ed. by J. V. Remenyi, reviewed by N. W. Simmonds, 228

Amaranthus hybridus, see African Spinach

Arachis hypogaea, see Groundnut

Asia, west, and north Africa, improving water use efficiency of annual crops in the rainfed farming systems there (Cooper, Gregory, Tully and Harris), 113

Attributes of Trees as Crop Plants, ed. by M. G. R. Cannell and J. E. Jackson, reviewed by J. Grace, 106

Australia, northern, and the effects of planting time and harvest age on cassava there. I. Crop growth and yield in moist environments (Hammer, Hobman and Shepherd), 401; II. Crop growth and yield in a seasonally-dry environment (Hobman, Hammer and Shepherd), 415

Azolla pinnata isolates, their use as organic nitrogen sources for lowland rice (Singh and Singh), 159

Beans, bush, and cultivar × cropping system interactions in relay and row intercropping with different maize plant types (Woolley and Rodríguez), 181

Biological degradation and nitrate accumulation in peat soil as affected by high yielding perennial herbage crops (Levanon, Levin, Kipnis and Cohen), 69

Biomass Energy: a Monograph, ed. by E. A. Hiler and B. A. Stout, reviewed by J. L. Monteith, 105

Biotechnology in Agriculture and Forestry, ed. by Y. P. S. Bajaj, reviewed by G. G. Henshaw, 472

Botswana and the intercropping of sorghum with cowpea in dryland farming systems there. I. Field experiments and relative advantages of intercropping (Lightfoot and Tayler), 425; II. Comparative stability of alternative cropping systems (Lightfoot, Dear and Mead), 435

Botswana, plant population, rainfall and sorghum production there. I. Results of experiment station trails (Jones), 335; II. Development of farmer recommendations (Jones), 349

Brassica juncea, see Mustard

Camellia sinensis, see Tea

Cassava in northern Australia and the effects of planting time and harvest age. I. Crop growth and yield in most environments (Hammer, Hobman and Shepherd), 401; II. Crop growth and yield in a seasonally-dry environment (Hobman, Hammer and Shepherd), 415

Cassava mosaic severity in planting material and its relationship to mosaic development, growth and yield of cassava in Zaire (Muimba-Kankolongo and Phuti), 221

Cereal–legume mixtures grown for hay production and the effects of crop maturity, weather conditions and cutting height on their yield, harvesting losses and nutritive value (Rihawi, Capper, Osman and Thomson), 451

Chickpea cultivars and their response to water stress in a semi-arid environment (Sivakumar and Singh), 53

Chillies, intercropped and monocropped, and the seasonal variation in their water uptake and leaf water potential (Hulugalle and Willatt), 273
Chlormequat chloride and the influence of the mode and time of its application on groundnut under semi-arid rainfed conditions in north-west India (Giri and Gangasaran), 87
Chlormequat's influence on the growth and yield of irrigated and rainfed Indian mustard in the field (Saini, Jolly and Singh), 319
Clove tree yields in the islands of Zanzibar and Pemba (Martin, Riley and Dabek), 293
Cocoa, Amazon, in Ghana; twenty years' results from a shade and fertilizer trial (Ahenkorah, Halm, Appiah, Akrofi and Yirenkyi, 31
Coffee leaves and the permanence of free water on them (Guzman and Gomez), 213
Conservation of genetic resources (Astley), 245
Cotton leaf reddening in the irrigated Gezira (Ishag, Ayoub and Said), 207
Cotton-based multiple cropping studies (Mandal, Ghosh, Das and Choudhury), 443
Cowpea and sorghum genotype and sorghum sowing density effects in an intercrop system (de Queiroz and Galwey), 387
Cowpea and sorghum intercropping in dryland farming systems in Botswana. I. Field experiments and relative advantages of intercropping (Lightfoot and Tayler), 425; II. Comparative stability of alternative cropping systems (Lightfoot, Dear and Mead), 435
Cowpea in crop mixtures and insect pest control (Fisher, Raheja and Elemo), 9
Cowpea/maize intercrop system; relative sowing time and density of component crops (Ofori and Stern), 41
Cowpea's response to spacing in the savanna and rainforest zones of Nigeria: response surface analysis (Odulaja and Kayode), 63
Crop Protection Chemicals Reference, by Chemical and Pharmaceutical Press, reviewed by James Gilmour, 472
Cultivar × cropping system interactions in relay and row intercropping of bush beans with different maize plant types (Woolley and Rodríguez), 181
Cultivars of chickpea and their response to water stress in a semi-arid environment (Sivakumar and Singh), 53
Cutting height, crop maturity and weather condition effects on yield, harvesting losses and nutritive value of cereal–legume mixtures grown for hay production (Rihawi, Capper, Osman and Thomson), 451

Daylight intensity effects on the growth of African spinach in the dry season in southern Nigeria (Eze), 193
De-branching of mustard and its effect on yield and yield components (Chauhan, Bhargava and Tomar), 395
Defoliation, artificial, of okra and its effects on growth and yield (Iremiren), 1
Density and relative sowing time of component crops in a maize/cowpea intercrop system (Ofori and Stern), 41
Development of spring wheat in relation to base temperature (del Pozo, García-Huidobro, Novoa and Villaseca), 21
Drought and gypsum effects on pod initiation and crop yield in early maturing groundnut genotypes (Rajendrudu and Williams), 259
Drought stress and late blight of potato crops grown under tropical highland conditions as affected by shifting planting dates and mulching (Devaux and Haverkort), 325
Dry season in southern Nigeria and the growth of African spinach under different daylight intensities (Eze), 193
Dryland farming systems in Botswana and the intercropping of sorghum with cowpea. I. Field experiments and relative advantages of intercropping (Lightfoot and Tayler), 425; II. Comparative stability of alternative cropping systems (Lightfoot, Dear and Mead), 435

Elements of Graphing Data (The), by William S. Cleveland, reviewed by H. D. Patterson, 357
Environmental modulation of flowering in mung bean: a reappraisal (Summerfield and Lawn), 461
Establishment and grain yield of rice in rainfed lowland (intermediate deep-water) conditions as affected by transplanting and seedling age (Reddy, Ghosh and Reddy), 201

Farming systems in the drylands of Botswana and the intercropping of sorghum

with cowpea. I. Field experiments and relative advantages of intercropping (Lightfoot and Tayler), 425; II. Comparative stability of alternative cropping systems (Lightfoot, Dear and Mead), 435
Farming systems, rainfed, of west Asia and north Africa and improving water use efficiency of annual crops (Cooper, Gregory, Tully and Harris), 113
Farming systems research and the implications of crop–livestock interactions in sub-Saharan Africa (McIntire and Gryseels), 235
Farming systems research: procedures for technology development (Collinson), 365
Fertilizer and shade trial on Amazon cocoa in Ghana, twenty years' results (Ahenkorah, Halm, Appiah, Akrofi and Yirenkyi), 31
Flowering in mung bean and its environmental modulation: a reappraisal (Summerfield and Lawn), 461

Genetic Manipulation in Plant Breeding, ed. by W. Horn, C. J. Jensen, W. Odenbach and O. Schieder, reviewed by N. W. Simmonds, 471
Genetic resource conservation (Astley), 245
Gezira, irrigated, and the reddening of cotton leaves (Ishag, Ayoub and Said), 207
Ghana, twenty years' results from a shade and fertilizer trial on Amazon cocoa (Ahenkorah, Halm, Appiah, Akofri and Yirenkyi), 31
Groundnut and the effects of elemental sulphur on shoot dry weight, nodulation and pod yield under irrigation (Hago and Salama), 93
Groundnut and the influence of mode and time of chlormequat chloride application under semi-arid rainfed conditions in north-west India (Giri and Gangasaran), 87
Groundnut nodulation, nitrogen fixation, root and hypocotyl growth and yield as affected by sowing depth (Nambiar and Rao), 283
Groundnut pod initiation and crop yield in early maturing genotypes as affected by gypsum and drought (Rajendrudu and Williams), 259
Gypsum and drought effects on pod initiation and crop yield in early maturing groundnut genotypes (Rajendrudu and Williams), 259

Harvest date of sugarbeet and planting techniques to advance it in north Indian conditions (Narang and Bains), 99
Harvesting losses, yield and nutritive value of cereal–legume mixtures grown for hay production as affected by crop maturity, weather conditions and cutting height (Rihawi, Capper, Osman and Thomson), 451
Hay production from cereal–legume mixtures and the effects of crop maturity, weather conditions and cutting height on its yield, harvesting losses and nutritive value (Rihawi, Capper, Osman and Thomson), 451
Herbage crops, high yielding perennial, and their effect on biological degradation and nitrate accumulation in peat soil (Levanon, Levin, Kipnis and Cohen), 69
Highland tropical conditions and the effects of shifting planting dates and mulching on late blight and drought stress of potato crops (Devaux and Haverkort), 325
Hypocotyl and root growth, nodulation, nitrogen fixation and yield in groundnut as affected by sowing depth (Nambiar and Rao), 283

India, north, and techniques for planting sugarbeet to advance the harvest date there (Narang and Bains), 99
India, north-west, and the influence of mode and time of chlormequat chloride application on groundnut under semi-arid rainfed conditions there (Giri and Gangasaran), 87
Innovation Policy for Small Farmers in the Tropics. The Economics of Technical Innovations for Agricultural Development, by H. Ruthenberg, ed. by H. E. Jahnke, reviewed by M. Lipton, 228
Instrumentation for Environmental Physiology, ed. by B. Marshall and F. I. Woodward, reviewed by M. H. Unsworth, 228
Intercrop system and the effects of sorghum and cowpea genotype and sorghum sowing density (de Queiroz and Galwey), 387
Intercrop system of maize/cowpea and the relative sowing time and density of component crops (Ofori and Stern), 41

Intercropped and monocropped chillies and the seasonal variation in their water uptake and leaf water potential (Hulugalle and Willatt), 273
Intercropping, relay and row, of bush beans with different maize plant types and cultivar × cropping system interactions (Woolley and Rodríguez), 181
Intercropping sorghum with cowpea in dryland farming systems in Botswana. I. Field experiments and relative advantages of intercropping (Lightfoot and Tayler), 425; II. Comparative stability of alternative cropping systems (Lightfoot, Dear and Mead), 435
Irrigated and rainfed Indian mustard and the influence of chlormequat on its growth and yield in the field (Saini, Jolly and Singh), 319
Irrigated Gezira and the reddening of cotton leaves (Ishag, Ayoub and Said), 207
Irrigated groundnut and the effects of elemental sulphur on shoot dry weight, nodulation and pod yield (Hago and Salama), 93
Irrigated tea and its yield distribution at two sites in eastern Africa (Carr, Dale and Stephens), 75
Isobutylidene diurea, sulphur-coated urea and urea plus nitrapyrin, their efficiency compared with divided dressings of urea for dry matter production and nitrogen uptake of ryegrass (Halevy), 167

Late blight and drought stress of potato crops grown under tropical highland conditions as affected by shifting planting dates and mulching (Devaux and Haverkort), 325
Leaf juice and a pedal-assisted unit for making it (Pirie), 315
Leaf reddening of cotton in the irrigated Gezira (Ishag, Ayoub and Said), 207
Leaves of coffee and the permanence of free water on them (Guzman and Gomez), 213
Legume–cereal mixtures grown for hay production and the effects of crop maturity, weather conditions and cutting height on their yield, harvesting losses and nutritive value (Rihawi, Capper, Osman and Thomson), 451
Livestock–crop interactions in sub-Saharan Africa and their implications for farming systems research (McIntire and Gryseels), 235
Leaf water potential and water uptake of intercropped and monocropped chillies and their seasonal variation (Hulugalle and Willatt), 273
Lowland rice and the use of *Azolla pinnata* isolates as organic nitrogen sources (Singh and Singh), 159
Lowland rainfed (intermediate deep-water) conditions and the stand establishment and grain yield of rice as affected by transplanting and seedling age (Reddy, Ghosh and Reddy), 201
Lowland rainfed rice and its root growth and yield response to planting method (Sharma, De Datta and Redulla), 305

Maize plant types and cultivar × cropping system interactions in relay and row intercropping with bush beans (Woolley and Rodríguez), 181
Maize/cowpea intercrop system; relative sowing time and density of component crops (Ofori and Stern), 41
Manihot esculenta, *see* Cassava
Maturity of the crop, weather conditions and cutting height effects on yield, harvesting losses and nutritive value of cereal–legume mixtures grown for hay production (Rihawi, Capper, Osman and Thomson), 451
Mechanisms of Resistance to Plant Diseases, ed. by R. S. S. Fraser, reviewed by J. H. Lennard, 358
Mixtures of crops containing cowpea and insect pest control in them (Fisher, Raheja and Elemo), 9
Mosaic severity in cassava planting material and its relationship to mosaic development, growth and yield of cassava in Zaire (Muimba-Kankolongo and Phuti), 221
Mulching and planting date effects on late blight and drought stress of potato crops grown under tropical highland conditions (Devaux and Haverkort), 325
Multiple cropping based on cotton (Mandal, Ghosh, Das and Choudhury), 443
Mung bean flowering and its environmental modulation: a reappraisal (Summerfield and Lawn), 461
Mustard, Indian, irrigated and rainfed and the influence of chlormequat on its growth and yield in the field (Saini, Jolly and Singh), 319
Mustard yield and yield components as affected by de-branching (Chauhan, Bhargava and Tomar), 395

Nigeria, southern, and the growth of African

spinach under different daylight intensities in the dry season there (Eze), 193
Nigeria, the response of cowpea to spacing in the savanna and rainforest zones: response surface analysis (Odulaja and Kayode), 63
Nitrapyrin plus urea, isobutylidene diurea and sulphur-coated urea, their efficiency compared with divided dressings of urea for dry matter production and nitrogen uptake of ryegrass (Halevy), 167
Nitrate accumulation and biological degradation in peat soil as affected by high yielding perennial herbage crops (Levanon, Levin, Kipnis and Cohen), 69
Nitrogen fixation, nodulation, root and hypocotyl growth, and yield in groundnut as affected by sowing depth (Nambiar and Rao), 283
Nitrogen, the use of *Azolla pinnata* isolates as an organic source for lowland rice (Singh and Singh), 159
Nitrogen uptake and dry matter production of ryegrass and the efficiency of isobutylidene diurea, sulphur-coated urea and urea plus nitrapyrin compared with divided dressings of urea (Halevy), 167
Nodulation, nitrogen fixation, root and hypocotyl growth, and yield in groundnut as affected by sowing depth (Nambiar and Rao), 283
Nodulation, shoot dry weight and pod yield of groundnut under irrigation as affected by elemental sulphur (Hago and Salama), 93
Northern Challenge (The): a History of CSIRO Crop Research in Northern Australia, ed. by J. J. Basinski, I. M. Wood and J. B. Hacker, reviewed by K. R. M. Anthony, 358
Nutrient Requirements of: (1) *Cats*, (2) *Coldwater Fishes*, (3) *Dairy Cattle*, (4) *Goats: Angora, Dairy and Meat Goats in Temperate Countries*, (5) *Horses*, (6) *Laboratory Animals*, (7) *Mink and Foxes*, (8) *Nonhuman Primates*, (9) *Rabbits*, (10) *Swine*, (11) *Warm Water Fishes and Shellfishes*, (12) *Sheep*, (13) *Poultry*, (14) *Beef Cattle*, (15) *Dogs*, by various authors, reviewed by N. W. Simmonds, 359
Nutritive value, yield and harvesting losses of cereal-legume mixtures grown for hay production as affected by crop maturity, weather conditions and cutting height (Rihawi, Capper, Osman and Thomson), 451
Oilseed Rape, ed. by D. H. Scarisbrick and R. W. Daniels, reviewed by F. Harper, 106
Okra growth and yield as affected by artificial defoliation (Iremiren), 1
Organic nitrogen sources for lowland rice, the use of *Azolla pinnata* isolates (Singh and Singh), 159
Oryza sativa, see Rice

Peat soil and the effect of high yielding perennial herbage crops on biological degradation and nitrate accumulation (Levanon, Levin, Kipnis and Cohen), 69
Pedal-assisted unit for making leaf juice (Pirie), 315
Pemba and Zanzibar and clove tree yields (Martin, Riley and Dabek), 293
People, Food and Resources, by Sir Kenneth Blaxter, reviewed by N. W. Simmonds, 228
Perennial herbage crops, high yielding, and their effect on biological degradation and nitrate accumulation in peat soil (Levanon, Levin, Kipnis and Cohen), 69
Pest, insect, control for cowpea in crop mixtures (Fisher, Raheja and Elemo), 9
Phytophthora infestans, see Late Blight
Planting dates and mulching effects on late blight and drought stress of potato crops grown under tropical highland conditions (Devaux and Haverkort), 325
Planting method of rainfed lowland rice and its effect on root growth and yield (Sharma, De Datta and Redulla), 305
Planting techniques for sugarbeet to advance the harvest date in north Indian conditions (Narang and Bains), 99
Planting time and harvest age effects on cassava in northern Australia. I. Crop growth and yield in moist environments (Hammer, Hobman and Shepherd), 401; II. Crop growth and yield in a seasonally-dry environment (Hobman, Hammer and Shepherd), 415
Pod yield, nodulation and shoot dry weight of groundnut under irrigation as affected by elemental sulphur (Hago and Salama), 93
Pod initiation and crop yield in early maturing groundnut genotypes as affected by gypsum and drought (Rajendrudu and Williams), 259
Population of plants, rainfall and sorghum production in Botswana. I. Results of experiment station trials (Jones), 335; II. Development of farmer recommendations (Jones), 349

Potato crops grown under tropical highland conditions and the effects of shifting planting dates and mulching on late blight and drought stress (Devaux and Haverkort), 325

Principles of Plant Biotechnology: an Introduction to Genetic Engineering in Plants, by J. H. Mantell, J. A. Matthews and R. A. McKee, reviewed by C. Leaver, 105

Rainfall, plant population and sorghum production in Botswana. I. Results of experiment station trials (Jones), 335; II. Development of farmer recommendations (Jones), 349

Rainfed and irrigated Indian mustard and the influence of chlormequat on its growth and yield in the field (Saini, Jolly and Singh), 319

Rainfed farming systems of west Asia and north Africa, improving water use efficiency of annual crops (Cooper, Gregory, Tully and Harris), 113

Rainfed lowland (intermediate deep-water) conditions and the stand establishment and grain yield of rice as affected by transplanting and seedling age (Reddy, Ghosh and Reddy), 201

Rainfed lowland rice and its root growth and yield response to planting method (Sharma, De Datta and Redulla), 305

Rainfed semi-arid conditions in north-west India and the influence of mode and time of chlormequat chloride application on groundnut (Giri and Gangasaran), 87

Rainforest and savanna zones of Nigeria and the response of cowpea to spacing there: response surface analysis (Odulaja and Kayode), 63

Response surface analysis for the response of cowpea to spacing in the savanna and rainforest zones of Nigeria (Odulaja and Kayode), 63

Reddening of cotton leaves in the irrigated Gezira (Ishag, Ayoub and Said), 207

Rice Diseases, by S. H. Ou, reviewed by J. M. Waller, 357

Rice in the rainfed lowlands and its root growth and yield response to planting method (Sharma, De Datta and Redulla), 305

Rice, lowland, and the use of *Azolla pinnata* isolates as organic nitrogen sources (Singh and Singh), 159

Rice stand establishment and grain yield in rainfed lowland (intermediate deep-water) conditions as affected by transplanting and seedling age (Reddy, Ghosh and Reddy), 201

Root and hypocotyl growth, nodulation, nitrogen fixation and yield in groundnut as affected by sowing depth (Nambiar and Rao), 283

Root growth and yield response of rainfed lowland rice to planting method (Sharma, De Datta and Redulla), 305

Ryegrass dry matter production and nitrogen uptake, the efficiency of isobutylidene diurea, sulphur-coated urea and urea plus nitrapyrin compared with divided dressings of urea (Halevy), 167

Savanna and rainforest zones of Nigeria and the response of cowpea to spacing there: response surface analysis (Odulaja and Kayode), 63

Science of Allelopathy (The), ed. by A. R. Putnam and C-S. Tang, reviewed by R. J. Chancellor, 473

Seasonal variation in the water uptake and leaf water potential of intercropped and monocropped chillies (Hulugalle and Willatt), 273

Seed Ageing, by D. A. Priestley, reviewed by E. H. Roberts, 227

Seedling age and transplanting effects on stand establishment and grain yield of rice in rainfed lowland (intermediate deep-water) conditions (Reddy, Ghosh and Reddy), 201

Semi-arid environment and the response of chickpea cultivars to water stress (Sivakumar and Singh), 53

Semi-arid rainfed conditions in north-west India and the influence of mode and time of chlormequat chloride application on groundnut (Giri and Gangasaran), 87

Shade and fertilizer trial on Amazon cocoa in Ghana, twenty years' results (Ahenkorah, Halm, Appiah, Akrofi and Yirenkyi), 31

Shoot dry weight, nodulation and pod yield of groundnut under irrigation as affected by elemental sulphur (Hago and Salama), 93

Soil Physics and Rice, by various authors, reviewed by K. A. Smith, 106

Soils of India and their Management, ed. by B. C. Biswas and others, reviewed by Michael Stocking, 107

Sorghum and cowpea genotype and sorghum

sowing density effects in an intercrop system (de Queiroz and Galwey), 387
Sorghum and cowpea intercropping in dryland farming systems in Botswana. I. Field experiments and relative advantages of intercropping (Lightfoot and Tayler), 425; II. Comparative stability of alternative cropping systems (Lightfoot, Dear and Mead), 435
Sorghum production, plant population and rainfall in Botswana. I. Results of experiment station trials (Jones), 335; II. Development of farmer recommendations (Jones), 349
Sowing density of sorghum and sorghum and cowpea genotype effects in an intercrop system (de Queiroz and Galwey), 387
Sowing depth effects on nodulation, nitrogen fixation, root and hypocotyl growth, and yield in groundnut (Nambiar and Rao), 283
Sowing time and density of component crops in a maize/cowpea intercrop system (Ofori and Stern), 41
Spacing of cowpea in the savanna and rainforest zones of Nigeria: response surface analysis (Odulaja and Kayode), 63
Sub-Saharan Africa and the implications of crop–livestock interactions there for farming systems research (McIntire and Gryseels), 235
Sugarbeet planting techniques to advance the harvest date in north Indian conditions (Narang and Bains), 99
Sulphur, elemental, and its effects on shoot dry weight, nodulation and pod yield of groundnut under irrigation (Hago and Salama), 93
Sulphur-coated urea, isobutylidene diurea and urea plus nitrapyrin, their efficiency compared with divided dressings of urea for dry matter production and nitrogen uptake of ryegrass (Halevy), 167
System of cropping X cultivar interactions in relay and row intercropping of bush beans with different maize plant types (Woolley and Rodríguez), 181
Systems Approach to Conservation Tillage (A), ed. by F. M. D'Itri, reviewed by R. P. C. Morgan, 107

Tea and its yield distribution at two sites in eastern Africa when irrigated (Carr, Dale and Stephens), 75
Technology development procedures in farming systems research (Collinson), 365
Technology in the 1990s: Agriculture and Food. ed. by K. L. Baxter and L. Fowden, reviewed by N. W. Simmonds, 227
Temperature, base, and its relationship to development in spring wheat (del Pozo, García-Huidobro, Novoa and Villaseca), 21
Theobroma cacao, see Cocoa
Thin Section Preparation of Soils and Sediments, by C. P. Murphy, reviewed by E. A. Fitzpatrick, 472
Transplanting and seedling age effects on stand establishment and grain yield of rice in rainfed lowland (intermediate deep-water) conditions (Reddy, Ghosh and Reddy), 201
Tropical highland conditions and the effects of shifting planting dates and mulching on late blight and drought stress of potato crops (Devaux and Haverkort), 325

Urea plus nitrapyrin, isobutylidene diurea and sulphur-coated urea, their efficiency compared with divided dressings of urea for dry matter production and nitrogen uptake of ryegrass (Halevy), 167

Vegetable Diseases and their Control, by A. F. Sherf and A. A. Macnab, reviewed by J. M. Waller, 471
Vigna radiata, see Mung Bean
Vigna unguiculata, see Cowpea

Water on coffee leaves, its permanence (Guzman and Gomez), 213
Water stress and the response of chickpea cultivars in a semi-arid environment (Sivakumar and Singh), 53
Water uptake and leaf water potential of intercropped and monocropped chillies and their seasonal variation (Hulugalle and Willatt), 273
Water use, improving its efficiency for annual crops in the rainfed farming systems of west Asia and north Africa (Cooper, Gregory, Tully and Harris), 113
Weather conditions, crop maturity and cutting height effects on yield, harvesting losses and nutritive value of cereal–legume mixtures grown for hay production (Rihawi, Capper, Osman and Thomson), 451
Wheat, spring, and its development in relation to base temperature (del Pozo, García-Huidobro, Novoa and Villaseca), 21

Yield and growth of irrigated and rainfed Indian mustard in the field as influenced by chlormequat (Saini, Jolly and Singh), 319
Yield and growth of okra as affected by artificial defoliation (Iremiren), 1
Yield and pod initiation in early maturing groundnut genotypes as affected by gypsum and drought (Rajendrudu and Williams), 259
Yield and yield components of mustard as affected by de-branching (Chauhan, Bhargava and Tomar), 395
Yield distribution in irrigated tea at two sites in eastern Africa (Carr, Dale and Stephens), 75
Yield, growth and mosaic development of cassava in Zaire in relation to cassava mosaic severity in planting material (Muimba-Kankolongo and Phuti), 221
Yield, harvesting losses and nutritive value of cereal–legume mixtures grown for hay production as affected by crop maturity, weather conditions and cutting height (Rihawi, Capper, Osman and Thomson), 451
Yield, nodulation, nitrogen fixation and root and hypocotyl growth in groundnut as affected by sowing depth (Nambiar and Rao), 283
Yield of grain and establishment of rice in rainfed lowland (intermediate deepwater) conditions as affected by transplanting and seedling age (Reddy, Ghosh and Reddy), 201
Yield of pods, nodulation and shoot dry weight of groundnut under irrigation as affected by elemental sulphur (Hago and Salama), 93
Yield response and root growth of rainfed lowland rice to planting method (Sharma, De Datta and Redulla), 305
Yields of clove trees in the islands of Zanzibar and Pemba (Martin, Riley and Dabek), 293

Zaire, relationship of cassava mosaic severity in planting material to mosaic development, growth and yield of cassava there (Muimba-Kankolongo and Phuti), 221
Zanzibar and Pemba and clove tree yields (Martin, Riley and Dabek), 293

INDEX OF AUTHORS

Ahenkorah, Y., Halm, B. J., Appiah, M. R. Akrofi, G. S. and Yirenkyi, J. E. K. Twenty years' results from a shade and fertilizer trial on Amazon cocoa (*Theobroma cacao*) in Ghana, 31
